

The Sumo Trailer

The ultimate solution for guilt-free, large-scale weed control

The Sumo Trailer represents a significant milestone for the efficient treatment of medium and large sized agricultural and horticultural properties. It runs off the "Power Take Off" shaft of the tractor tow vehicle. The PTO drive pump and generator combination, removes the need for an engine and reduces complexity, machine cost as well as running and servicing costs.

Gotta job for this one? **0800 112 890**

- ✓ Unique PTO powered pump charging system
- ✓ Fully galvanised purpose built trailer
- ✓ Available as a road registered agricultural trailer
- ✓ Rated for 3500kg on road (empty tank) and 6000kg off road
- ✓ 4000L tank with 15 years warranty
- ✓ Simply change from 50mm hitch to agricultural standard ring hitch

The Sumo (a.k.a. SW2800) is a continuous flow hot water head exchanger, delivering superheated water to our patented Satusteam nozzle system at an effective 24 litres a minute.

Combined with our selection of applicator heads, it can be used in intensive horticulture such as vines, berries and orchards.

Diesel usage 8 litre/hour

Water usage 24 litre/minute

Weight 190kg

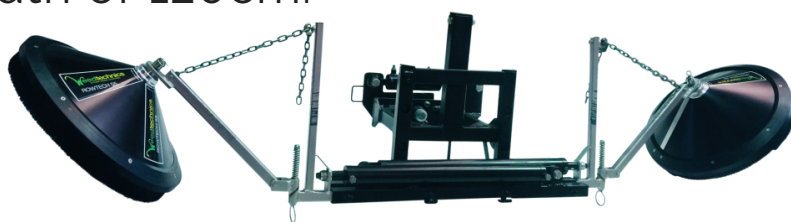

Dimensions 117*60*120h

Recommended Accessories

The Orchard 120 is designed to be towed behind or beside vehicles to treat strips of weeds along orchard plantation rows, with a swept path width of 120cm.

The Hydra-Boom with Rowtech heads allows for gentle and close-contact treatment around the base of trunks, vines, posts and bushes. With options for remote control available, this set up is the ultimate in automated weed control.

Safe operations, maintenance and productivity training is required for first machine purchase.
